

Scalability and Future Plan

PocketSmart AI | Team ID 6aba1a835015c35b98635933 | Team Leader: Rohith S | Members: Heedhesh R, Ashwin S, Chandru T

- **Scalability:** move from SQLite to PostgreSQL, deploy behind a production server, add Gemini timeouts, retries and rate limits, cache repeated requests.
- **Short term:** typed validation of AI output, password reset, accessibility fixes.
- **Medium term:** configurable regions and currencies, refreshable prices, image privacy controls.
- **Long term:** purchasing or booking through partner integrations, CI with browser tests, Tamil and Hindi support.
