

Hardware Requirements

PocketSmart AI | Team ID 6aba1a835015c35b98635933 | Team Leader: Rohith S | Members: Heedhesh R, Ashwin S, Chandru T

Development

- Laptop or desktop able to run Python 3.10+
- 4 GB RAM recommended
- Internet access to install packages and call the Gemini API (optional)

Hosting

No specialised hardware is needed for a demonstration deployment. For production, choose capacity from expected concurrent users, image sizes and Gemini latency, and confirm with load testing.
