

Test Cases

PocketSmart AI | Team ID 6aba1a835015c35b98635933 | Team Leader: Rohith S | Members: Heedhesh R, Ashwin S, Chandru T

Run from 5. Project Development Phase with dependencies installed. Cases marked (AI) need a Gemini key and network access.

ID	Scenario	Steps / input	Expected result
TC-01	Landing page	Open /	Page renders
TC-02	Planner navigation	Log in, open the three planner pages	Each renders
TC-03	Home plan	Submit a positive budget, rooms and style	Plan returned and saved
TC-04	Party plan	Submit event, guests and budget	Plan returned and saved
TC-05	Jewelry plan	Submit occasion and budget without image	Suggestions returned and saved
TC-06	Jewelry image	Submit a valid and an invalid image	Valid accepted; invalid returns 415 or 422
TC-07	History	Generate a plan, GET /api/history	Entry listed
TC-08	Clear history	DELETE then GET /api/history	Empty list
TC-09	Register and login	Register, then request a token	201 then bearer token and cookie
TC-10	Duplicate registration	Register the same user twice	409 conflict
TC-11	No Gemini key	Start without GEMINI_API_KEY	App starts; offline plans shown
TC-12	Gemini failure (AI)	Use an invalid key and submit a plan	Offline plan returned; server stays up
TC-13	Account isolation	Two users create plans	Each sees only their own history
TC-14	Protected access	Log out, call /api/me	401 Unauthorized
TC-15	Long password	72-byte and 73-byte passwords	72 accepted; 73 rejected
