Automated Run

Date	Command	Environment	Result
2026-09-29	python -m compileall -q on app and tests	Python 3.14.6, Windows	Passed
2026-09-29	python -m pip check	Installed requirements	Passed, no broken requirements
2026-09-29	python -m unittest discover -s "6. Project Testing" -p "test_*.py" -v	FastAPI TestClient, temporary SQLite, Gemini key absent	8 tests passed

Coverage: templates, public and protected routes, registration (duplicate and invalid), bcrypt and JWT login, cookie and bearer authentication, logout, all three offline planners, budget totals, per-user history isolation and clearing, valid and invalid outfit images, empty-services party case, Gemini provider contract (mocked SDK), automatic SQLite creation, static assets.

Browser Run

Check	Result
Register, sign in, dashboard, navigation	Passed
Submit Home, Party and Jewelry plans with Gemini unconfigured	Passed (each showed an offline recommendation)
History list and clear	Passed
Logout and protected API afterwards	Passed (401)
Jewelry text-injection probe	Passed (rendered as text)
Mobile layout at 390 px	Passed, no horizontal overflow
/favicon.ico	Passed (redirects to SVG)

Screenshots are in the Screenshots/ folder.

Performance Testing

Not performed. No load-testing tool (for example Locust or k6) was run. Add results here if you run one.

Limitations

No Gemini key was configured, so no live request was sent. The configured-provider path was tested with a mocked response. Live credentials, quota and availability remain unverified.
